

California Invasive Plant Council: Student Chapter

Recruitment Meeting

The Cal-IPC Student Chapter is a student organization dedicated to invasive species research, weed management, and community outreach. We are currently searching for new active members who want to learn about invasive species in California and help educate the public on one of California's greatest environmental threats.

The Cal-IPC Student Chapter welcomes students from all academic disciplines. You do not need to study invasive plants to join, you just need a general interest in our mission.

Current Cal-IPC SC Projects include:

- *Attending local Plant Sales and advising the public on responsible landscaping techniques.
- *Performing weed removal in local natural areas.
- *Creating K-12 Educational materials to help students understand how invasive species affect ecology.
- *Creating research projects studying the effects of invasive species on wildlands.
- *Collaborating with local weed managers on how to effectively manage species of concern.

**Pizza and Beverages
will be provided**

Thursday

June 3, 2010

12:00PM

Batchelor Hall 1104

Student Chapter members after pulling weeds at the Santa Rosa Plateau Ecological Reserve.
