

Become A MHCP Peer Mentor

Opportunity to expand leadership skills and service to others

PEER

MENTOR

What they're
saying:

Being an MHCP peer mentor is a unique experience that fosters the improvement of leadership and professional skills. I have grown both personally and professionally, learning from our prehealth advisors as well as fellow mentors. I feel privileged to be a part of this phenomenal program.

-CONNIE MARTIN

Having a the support of MHCP through my pre-med years has given me the motivation and skills of a competitive applicant. The peer mentor program breeds success with the exceptional students and staff that provide guidance along the path to a health profession.

-KEVIN KANE

I love sharing information with my peers. I think that if we all help each other, we can all achieve a common goal. MHCP provides so much great advice and encourages people to work together to pursue their professional endeavors. I think the sense of camaraderie is the best thing about MHCP.

-CHRIS FOO

I became a peer mentor because I wanted to give; yet I neglected to realize how much I'd get in return. I've gained both professional and communications skills, great advisors that are always there for me, and last but not least- lifelong friends.

-ANNA SROUJI

It is a great feeling to be able to help and guide students who are going through the same struggles that you yourself have gone through in the past. Having been there yourself you are able to not only be more understanding of their situation, but also have an idea of how to help them through it. What I think peer mentors find surprising, however, is that they learn from their mentees just as much and how being a peer mentor actually helps them stay on track in their own pre-health career.

-COLETTE MARTIN

MHCP Peer Mentors are successful pre-health students committed to supporting peers with similar health professions goals.

If you have diverse and / or in depth experiences in leadership, service, research or other areas and possess a strong commitment to share with and mentor others, then please **consider becoming a MHCP Peer Mentor.**

We are seeking students interested in all health careers including:
