# JUMP-START YOUR CAREER

## THE DEVELOPMENT SCIENCES DRUG DEVELOPMENT TRAINING PROGRAM (DDTP)

### PROGRAM QUALIFICATIONS:

- Recent (within two years) graduate of a doctoral program (MD, PhD, DVM or similar) or current doctoral students in their last year
- Must have studied one of the following disciplines: biology, biochemistry, biomedical engineering, biomedical sciences, cell biology, chemistry, chemical engineering, data science/ bioinformatics, microbiology, pharmaceutical sciences, pharmacology, toxicology, or related field
- Experience working in research labs or industrial biotech through internships
- Possesses a strong academic performance and publication record

### REQUIREMENTS:

- Strong critical thinking, communication (written and verbal) and collaboration skills
- Intense interest in pursuing a career in the drug development industry
- Highly self-motivated and exceptionally productive
- Able to work independently or as part of multi-disciplinary teams that strive to ensure the delivery of Genentech's products to patients
- Demonstrated leadership skills and desire to help patients and their local communities

We are excited to announce the launch of a new training program for Early-in-Career doctoral graduates—the Drug Development Training Program (DDTP). As part of Development Sciences, the DDTP will give recent doctoral graduates the chance to gain hands-on training and mentoring in multiple areas of clinical and pre-clinical drug development.

DDTP trainees will spend three years gaining invaluable, on-the-job experience in one of the functions of the Development Sciences organization in South San Francisco, California. These functions, which support multiple aspects of drug development, include:

- Preclinical and Translational Pharmacokinetics/Pharmacodynamics (PK/PD) (Preclinical PK, Drug Metabolism, Translational Sciences and Systems Pharmacology)

- Clinical Pharmacology (Clinical Pharmacokinetics, Trial Design, Dose-finding, and Modeling and Simulation)

- Safety Assessment (in vitro and in vivo Toxicology, Translational Sciences and Pathology)

- BioAnalytical Sciences (PK and PD assay development and technology)

- Oncology and Non-Oncology Biomarker Development (Clinical Biomarker Discovery and Development, Translational Sciences and Diagnostics)

The DDTP is a three-year position. The ultimate goal is to prepare participants with the skills and experience they need to secure a scientist-level position here, or at another top-tier biomedical research organization. During their time in the program, DDTP trainees will be considered full-time employees and eligible for benefits.

After more than 40 years of tackling the toughest medical challenges, we know that approaching any problem from a single point of view is setting a course for failure. Success depends upon welcoming diverse approaches, challenging the status quo and exploring hypotheses from all angles. Science demands diversity and so do we! We encourage students from all backgrounds and historically underrepresented groups to apply.

### APPLY TODAY

Apply to the DDTP here: https://go.gene.com/ddtp

The deadline to apply is **Friday May 14, 2021 at 5:30pm (PST)**

If you have any questions, please contacts us at **ddtp-d@gene.com**
