or scan the QR code!

REC ●

SciComm@UCR is hosting a multimedia research communication challenge to give UCR students like you the opportunity to showcase their research to a broader audience. This is a great opportunity to communicate your research to the public and the campus community. The video format lets you be creative in a way that isn't possible in a written thesis, poster presentation, or formal talk. Additionally, competitions like this are gaining popularity among top scientific publishers making multimedia communication an in-demand skill.

THE CHALLENGE

Create a **3 to 5-minute video** for the purposes of educating the public on your research in the STEM field. There are no restrictions about how to make the video - talking to the camera, using props, incorporating animations, whatever you want to convey your research (and maybe the story behind it) are all valid for submission. **The goal is to be clear and creative.** You must be a current UCR graduate or undergraduate student.

PRIZES

- First Place: **\$1000 + more!**
- Second Place: **\$500**
- Third Place: **\$250**

Submissions DUE November 12th, 2021
Award Ceremony: December 3rd, 2021

Undergraduate & Graduate submissions are judged separately

SUBMISSION CHECKLIST

- Submit your [unlisted video link](#) to our [Google Form](#) by **November 12th, 2021**. Alternatively, you may email the video file to scicommucr@gmail.com. Please make sure to submit the file named with Department_LastName_FirstName of the individual submitting or the main contact, as appropriate with "Video Competition 2021" in the subject line.
- Email the Signed Official Photo/Video Release Form emailed to scicommucr@gmail.com.
- Complete the [Google Form](#) and submit!
