

HAVE YOU SEEN ME?

I am a PhD student at UCR doing research on these alligator lizards and their mating behavior. The males hang on to the female's head with their jaws! It's almost their season (March-May) and I need to collect a number of them to study this behavior!

If you happen to see/catch them, **ALIVE**, please contact me at anguy639@ucr.edu. I also would love any pictures/videos you have of them! You will be acknowledged in my next paper when it gets published!

May vary in coloration!

Snake-like with teeny tiny legs!

Yellow eyes.
