

2024-2025 Seminar Series  
**CHARTING THE LANDSCAPE OF  
ETHICAL AI**

## **Ethics of Using AI in Research: Current Challenges and the Road Ahead**

**MOHAMMAD HOSSEINI**  
Northwestern University

October 18th, 12-1 pm

Scientists and engineers are increasingly using AI in research. Some use cases have merely yielded efficiency gains while others have enabled new types of and directions in research that would be impossible without AI. In this interactive session, the impacts of AI on the overall integrity of research, and ethical ambiguities resulting from further integration of AI in research, will be discussed.
