

Data Science Summer Fellowship

Data Science encompasses preparing data for analysis, cleansing, aggregating, manipulating the data and perform advanced data analysis. The wealth of data being collected and stored by the technologies can bring transformative benefits to organizations and societies around the world, but only if we can interpret it. That's where data science comes in.

This summer fellowship opportunity will provide Data Science training and team-based projects based on real data sets and problems provided by industry partners.

- \$5000 stipend
- 8-week summer experience (June 23rd - Aug 18th)
- Open to undergraduates and MS students
- Team-based projects
- Real datasets / projects provided by industry partners
- Technical & professional-development workshops

Application Deadline

March 31st
