

SPEAKS: *Science to Policy Education: Activating Knowledge for Sustainable Transportation*

A new NSF Graduate Student Research Traineeship opportunity aimed at reducing transportation greenhouse gas emissions through the integration of engineering, social sciences, environmental sciences, and public policy to promote environmental justice and equity.

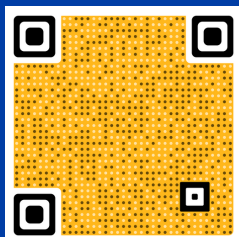

Are you:

- An exceptionally motivated civic-minded Ph.D. student?
- Seeking an opportunity to use science and engineering to help solve the climate crisis?
- Interested in learning to translate research into public policy?

Then SPEAKS is for you!

For more information, scan here or visit www.cert.ucr.edu/speaks

SPEAKS Program:

Innovative

- Multi-disciplinary education focused on sustainable transportation
- Uses unique UCR Science-to-Policy training
- Provides immersive government internships

Broad Impact

- Trains a diverse workforce in sustainable transportation
- Develops next-generation leaders and policy makers in science, industry and government

Student Support

- Networking, professional development and mentoring opportunities
- Up to six fully funded traineeships offered annually
