

Learning Design & Technology

Master of Science | Fully Online

Lead the future of digital learning with advanced design skills, human-centered innovation, and practical, cross-industry experience that equips you to drive impact anywhere that learning happens with Baylor University.

The Baylor Difference

- **Interdisciplinary & Experiential Learning:** Engage in hands-on technology labs that blend instructional theory with human-centered design.
- **Real-World Project Experience:** Collaborate with experienced designers and instructors on meaningful projects that address current challenges in online and digital learning.
- **Career-Forward Skill Development:** Gain the design, evaluation, and communication skills you need from coursework aligned with real industry demand.
- **Prior Learning Assessment:** Earn your degree faster by converting professional experience into academic credit.

6%

INDUSTRY GROWTH

According to the Bureau of Labor Statistics, the need for experts in learning design and technology will increase over the next decade.

R1

DESIGNATED

The Carnegie Classification of Institutions of Higher Education recognizes Baylor University as "Research 1: Very High Spending and Doctorate Production."

AI

INTEGRATED

Our students experience hands-on training in emerging technologies and actively integrate cutting-edge tools and methodologies.

Program and Timeline

The MS in Learning Design and Technology requires **30 credit hours**. The program typically takes **15 months to complete**, or 12 months on the accelerated path. Students can start in Spring, Summer, or Fall. Students earning the MS will also earn a Certificate in Online Teaching and Learning.

Application Requirements

Applicants need an accredited 4-year degree with a 3.0 GPA preferred. The GRE is not required.
