

Please join us!

The Department of Earth and Planetary Sciences invites the members of our fellow CNAS departments to join us in a private screening of the new documentary:

Picture a Scientist

This film examines the career paths and experiences of three scientists in the fields of biology (Nancy Hopkins), chemistry (Raychelle Burks), and geology (Jane Willenbring) and seeks to provide a variety of perspectives on how we can make science more welcoming to all bright minds. In watching this film, it is our hope that we can listen, learn, and reflect on our practices at UCR and enact positive change for our community. (www.pictureascientist.com).

Please join us in watching *Picture a Scientist* in a private, UCR CNAS only online screening room.

The screening room will open at **12 pm on October 29th, 2020** and remain open for viewing until **12 pm on November 1st**.

RSVP by 10/27 with your R'Mail credentials to receive log in details:
<https://forms.gle/AoEMCgPBJR7HVRTZ9>

All are warmly welcomed: staff, undergraduate students through distinguished professors
