

DATE: December 15, 2020

FROM: Office of Emergency Management

BUILDING NOTIFICATION

UCR has implemented multiple infection control and prevention measures during the Coronavirus pandemic. We are committed to keeping the community up-to-date on any potential health risks.

Individuals have confirmed positive case results of COVID-19 infection within the **Department of Entomology**. The individual has not been in the building for the following days **7 days**

Per UCR's established procedures and following Centers for Disease Control and Prevention (CDC), State and local guidelines, we have required:

- The affected individual to refrain from coming to campus for at least ten days.
- All individuals who had close/prolonged contact with this individual to do the same.

Individuals with close contact have been identified and notified through the Campus Case Investigation process. Names of individuals who have tested positive must not be shared, and all efforts to protect private health information is expected.

We ask all building patrons to continue to monitor their health care during the next 14 days, and if you are a UCR employee, please use the daily UCR COVID-19 Wellness Survey tool, <https://ehs.ucr.edu/coronavirus/symptoms-tool>. If you experience symptoms of COVID-19, contact Student Health Services at (951) 827-3031 for students, or the UCR Employee COVID-19 Hotline at (844) 827-6827, or contact your medical care provider. Symptoms may include flu-like conditions such as sore throat, dry cough, and fever (greater than 100.4°F). Other, less frequent symptoms may include nausea or diarrhea.

We care about your health. Please continue to practice all Coronavirus safety practices and protocols developed by the campus and work site-specific plans designed to enhance COVID-19 safety precautions

Sincerely,

Office of Emergency Management
