Essential Responsibilities:

- 5% Works with faculty to identify and develop new methods of advancing instruction in the discipline
- 5% Assesses learner performance and prepares reports recommending instructional improvements
- 10% Develops teaching techniques that enhance course effectiveness in alignment with desired outcomes and established strategy and may train other staff in use of these techniques
- 60% Provides classroom, online and/or laboratory instruction, including grading
- 10% Supervises the day-to-day activities of work unit employees involved in instructional support as needed
- 5% Assists in development of grant proposals for funding of model instruction programs
- 5% Assists in defining the objectives of the program and plays a major role in carrying out program duties

Education:

Required

PhD

PhD in Entomology, Bacteriology, Global Health, Comparative Biomedical Sciences or related field

Additional Information:

The College of Agricultural and Life Sciences (CALS) is committed to maintaining and growing a culture that embraces diversity, inclusion, and equity, believing that these values are foundational elements of our excellence and fundamental components of a positive and enriching learning and working environment for all students, faculty, and staff. At CALS, we acknowledge that bias, prejudice, racism, and hate have historically occurred in many forms that cause significant and lasting harm to members of our community. We commit to taking actions each day toward a college that is inclusive and welcoming to all.

How to Apply:

To apply for this position click "Apply Now" and upload a current resume/CV, coverletter, and a document with the names and contact information of three professional references as one document.

Number of individuals supervised: 6
