

# California Community College Internship Program

Have you ever considered a faculty career at a California Community College? The California Community College Internship Program (CCCIP) is an opportunity to gain community college experience inside and outside the classroom, receive advanced teaching training, network with community college professionals, and give you an edge as an applicant for California Community College career opportunities.

The CCCIP is open to UC Irvine, UC Riverside, and UC Davis PhD and MFA students in all fields. Students must be enrolled full-time, be in good academic standing, and have advanced to candidacy prior to starting the program in summer 2023. Interns will receive a \$7,500 fellowship stipend for the summer, during which they will engage in specialized training focused on community colleges and pedagogy.
