

WELCOME TO DEDOOSE

Great Research
Made Easy!

Congratulations!

Your organization has purchased Dedoose, a qualitative and mixed methods data analysis application, on your behalf. This welcome packet will connect you to learning resources and help you get the most value out of your organizational subscription. Contents include:

- Setting up your Account and Account Migration..... page 2
- Features and Benefits..... page 3
- Support Resources..... page 4
- Training Registration..... page 5
- Frequently Asked Questions..... page 6

Setting Up Your Account

For Those Without an Existing Account

If you do not have a Dedoose account, please email Heather (heather.killeen@ucr.edu) to indicate your interest in signing up and download the application by visiting dedoose.info/account.

For Those With an Existing Account

If you have an existing Dedoose account, please email premiumsupport@dedoose.com from your Dedoose email account in order to be migrated under your organization's subscription.

Account Migration

If you have an existing Dedoose account under a personal email and would like to migrate your projects and/or your account to your organizational email, contact premiumsupport@dedoose.com for assistance.

Frequently Asked Questions

What happens if I switch universities?

You can a) keep using Dedoose and we will transfer your projects to your new email address
b) choose to export your projects and we can deactivate your account

What supports do you have for students or novice researchers?

We offer departmental training and workshops throughout the year which can be recorded and stored in your university/department repository of resources, as well as free Dedoose learning resources on our website. As a member institution you also receive discounts on "Bring Your Own Data" summer camps hosted by the Institute for Mixed Methods Research.

Can I collaborate with people outside of my university?

Yes! Dedoose users can collaborate with any Dedoose user in the world thanks to our cloud-based technology. Real-time collaboration is included in every subscription and there is no limit to how many people you can collaborate with.

I have used other tools such as NVivo/Atlas/MAXQDA. Can I transfer my data to Dedoose?

Yes! We can assist users who want to migrate their data from other applications into Dedoose. We also support full export in QDPX format to allow for Dedoose projects to be migrated elsewhere. In short, we believe your data is yours and should not be bound to a single data analysis platform.

Who do I contact if I have an issue with my account?

Contact premiumsupport@dedoose.com if you experience any technical issues or need additional support and/or learning resources.
