WORKSHOP: INTRO TO UNIX

Genomics Auditorium 1102A
1pm - 3pm

This workshop will provide an introduction to the shell and command line interface. This workshop is intended for all users with no prior experience required. Topics covered include:

(1) Understanding the command line interface structure
(2) Common useful commands (e.g., ls, pwd, cd)
(3) Navigation using the command line
(4) And many more tools
