

Institute of Integrative Genome Biology Seminar Series

You are cordially invited to attend:
Dr. Ruth Welti

Distinguished Professor and Director of the Kansas
Lipidomics Research Center

Kansas State University

Using mass spectrometry-based lipidomics to gain
insight into plant lipid metabolism

Date: Friday, June 2nd

Time: 12:00 noon

Location: Genomics Auditorium 1102A

Abstract: Ruth Welti is the director of the Kansas Lipidomics Research Center, which runs a fee-for-service lipid profiling service. Her lab focuses on understanding plant lipid metabolism during stress responses and in seeds. She will discuss the use of lipidomics to identify the function of genes, to associate lipids and their metabolism with plant functions, and to identify novel lipids.
