

Computational Chemistry & Biophysics Workshop 2026

The future of drug discovery starts with a simulation, and now, so can you! Join us to explore how cutting-edge computational tools are revolutionizing drug design and protein engineering.

- ➔ **Learn** the principles behind molecular modeling with hands-on experience using real research software
- ➔ **Gain** exposure to the computational methods driving modern drug discovery
- ➔ **Open to all students**, build your academic career
- ➔ **In-person** at UCR Genomics Auditorium, UC Riverside campus

EVENT DETAILS

📅 **June 12-13, 2026**

Tentative dates, 2-day event

📍 **UCR Genomics Auditorium**

In-person, UC Riverside campus

Open to all students,
no experience
required!
