

# Whole Plasmid Sequencing Now Available at the Genomics Core Facility

The Genomics Core Facility is pleased to offer Whole Plasmid Sequencing services utilizing Oxford Nanopore long-read sequencing technology. This service is designed to support researchers and scientists across campus who require rapid, high-resolution validation and characterization of plasmid constructs.

With a streamlined workflow and fast turnaround times, our facility provides reliable sequencing data to accelerate your research and reduce experimental uncertainty.

## Available Through the Genomics Core

- ✓ Library preparation assistance
- ✓ Sequencing on multiple ONT platforms
- ✓ Experimental design consultation
- ✓ Primary data processing guidance
