

Experimental Design Sessions with 10x-perts

DATE & TIME

Thursday, October 10th, 2024
10:00 AM – 1:00 PM PT

LOCATION

UCR HUB Plaza Dining

The vast complexities of biology require approaches to build a complete picture, starting from single cells to tissues and beyond. At 10x Genomics, we provide single cell, spatial, and in situ technologies that fuel scientific discoveries and drive exponential progress. Unravel highly complex biological systems, while bringing into focus the details that matter most.

Sign up for your individual session to discuss how Chromium Single Cell, Visium Spatial, and Xenium In Situ platforms from 10x Genomics can help you push the boundaries of your research. Uncover molecular insights, dissect cell-type differences, investigate the adaptive immune system, detect novel subtypes and biomarkers, and map the epigenetic landscape cell by cell. Enabling deeper insight into cancer, immunology, neuroscience, and developmental biology, 10x Genomics gives researchers the ability to see biology in new ways.

Please email tu.luu@10xgenomics.com to schedule an appointment to reserve your 30 minute slot by providing 2 available times between 10am-1pm. A calendar reminder will be sent to confirm your session
