

Plant Pathology 250

WINTER SEMINAR SERIES

Speaker: Fabiola Pulido-Chavez

Plant Pathology Graduate Student University of California, Riverside

Seminar Title: “Fine-scale temporal succession of soil microbial communities in California chaparral

Biography: Fabiola Pulido is a third-year Ph.D. student in Dr. Sydney Glassman's lab. Her research focuses on understanding the effects of wildfire on the soil microbial communities of California chaparral and their successional dynamics.

&

Speaker: Christopher Drozd

Plant Pathology Graduate Student University of California, Riverside

Seminar Title: “Does the early bird get the worm? Exploring priority effects in the *Citrus* bacteriome”

Biography: Christopher Drozd is a third-year Ph.D. student in Dr. Caroline Roper's lab. His research studies the microbial ecology of Huanglongbing, as well as potential microbiota-mediated solutions to this devastating disease.

Date: Thursday, March 4th, 2021

Time: 12:00 – 12:50 p.m.

Zoom Meeting ID: 927 3762 0688

Zoom Passcode: 726196
