

Gordon Research Conferences *frontiers of science*

Announcing the 2026 Gordon Research Conference on:

Microbiome Editing

Date and Location:

January 11-16, 2026

Sheraton Fairplex Hotel & Conference Center
Pomona, California, United States

Organizers:

Co-Chairs: Jennifer Doudna & David Bikard
Co-Vice Chairs: KC Huang & Michelle O'Malley

Meeting Description:

The MicrobiomeEditing GRC is an international conference showcasing unpublished, cutting-edge research and fostering discussion and collaboration across all career stages. Over five days* in a remote setting, the program will feature world-leading speakers and discussion leaders, as well as **short talks by attendees, poster sessions**, and ample opportunities for informal interactions through communal meals and unstructured time. This inaugural meeting will explore how advances in microbiome editing can drive impact on human health and the environment by connecting fundamental research with emerging technologies.

* Registration fee covers lodging, meals & conference costs

APPLY HERE!

If you'd like to give a short talk - fill out this form!
