

Winter 2021 Quarter:

BENDING THE CURVE:

Climate Change Solutions

UCR credit course: ENGR 171/PBPL 171
UCR extension course: ENGR 826

January 5th – March 13th, 2021; online
Tuesdays & Thursdays 6:30pm – 7:50pm
Professor Matthew Barth

This undergrad course titled “Bending the Curve: Climate Change Solutions” is being taught at UC Riverside this Winter 2021 quarter. This course originated out of the UC Carbon Neutrality Initiative that brought together researchers and scholars from across the UC system to collaborate on developing a groundbreaking *Bending the Curve* multi-disciplinary course that challenges students to identify locally and globally scalable climate solutions.

The primary goal of the course is to increase a new generation of engaged climate experts. This course is intradisciplinary in nature which should attract people from various backgrounds and fields of study to have them understand and explore solution-focused ideas. This course will feature video lectures from top UC experts and in-person videos from UCR faculty, covering the multidisciplinary aspect of climate change. Enrolled UCR students will also have the opportunity to develop course projects.
